

1. Write a program to open a file named python stored on my desktop

```
f=open("Desktop\\python")
```

```
-----  
-----  
FileNotFoundError                                Traceback (most recent call  
last)  
<ipython-input-11-032cf8fe67cc> in <module>  
----> 1 f=open("Desktop\\python")
```

```
FileNotFoundError: [Errno 2] No such file or directory: 'Desktop\\  
python'
```

2. Write a program to read first 10 characters from a file named python

```
f=open("Desktop\\python")  
data=f.read(10)  
print(data)
```

```
-----  
-----  
FileNotFoundError                                Traceback (most recent call  
last)  
<ipython-input-12-006667dbe673> in <module>  
----> 1 f=open("Desktop\\python")  
      2 data=f.read(10)  
      3 print(data)
```

```
FileNotFoundError: [Errno 2] No such file or directory: 'Desktop\\  
python'
```

3. Delete the file

```
import os  
os.remove("python")
```

```
-----  
-----  
FileNotFoundError                                Traceback (most recent call  
last)  
<ipython-input-13-55cf92ea9e67> in <module>  
      1 import os  
----> 2 os.remove("python")
```

```
FileNotFoundError: [Errno 2] No such file or directory: 'python'
```
